

Website planning and creation

Digital Marketing Module – 3

Lecture 1

Objective of the Lecture

- Understand the importance of a website in digital marketing
 - Learn how to plan a website
 - Understand domain & hosting basics
 - Learn steps to create a website
-

1. What is a Website?

A website is a collection of web pages available on the internet under a domain name.

 In digital marketing, a website acts as:

- Your **online business/store**
 - A **marketing platform**
 - A **lead generation tool**
-

2. Why Website is Important?

- Builds **online presence**
 - Creates **brand trust**
 - Helps in **SEO & ads**
 - Works **24/7**
-

3. Website Planning

✓ Define Purpose

- Business website
- Blog
- Portfolio

✓ Identify Target Audience

- Age, location, needs

✓ Set Goals

- Sales
- Leads
- Awareness

📁 4. Website Structure (Pages)

- Home
- About
- Services / Products
- Contact
- Blog (optional)

🎨 5. Design & UX Basics

- Clean design
- Mobile-friendly
- Fast loading
- Easy navigation

🌐 6. Domain Name Guide

🔑 What is a Domain Name?

A domain is your website address

👉 Example: google.com

✅ How to Choose a Good Domain Name

- Keep it **short & simple**
- Easy to **remember & type**
- Use **business-related keywords**
- Avoid numbers & hyphens
- Choose right extension:
 - .com (best)
 - .in (India)
 - .org (organization)

👉 Example:

- Good: fitnesshub.com
 - Bad: fitness-123-online-site.com
-

⚠ Tips for Students

- Check if domain is available
 - Keep brand-friendly name
 - Think long-term
-

🛒 7. How to Purchase a Domain

Step-by-Step:

1. Go to domain provider:
 - GoDaddy
 - Namecheap
 - Google Domains
 2. Search your domain name
 3. Select available domain
 4. Add to cart
 5. Create account
 6. Make payment
 7. Domain is registered
-

🏠 8. What is Hosting?

Hosting is a service where your website files are stored so people can access it online.

👉 Without hosting → website cannot go live

Types of Hosting

- Shared Hosting (cheap, beginner)
 - VPS Hosting (medium)
 - Dedicated Hosting (advanced)
-

💳 9. How to Purchase Hosting

Step-by-Step:

1. Choose hosting provider:
 - Hostinger
 - Bluehost
 - SiteGround
2. Select plan (start with basic)

3. Create account
 4. Buy hosting plan
 5. Connect your domain
 6. Install WordPress
-

10. Website Creation

Tools for Website Creation

- **CMS (Content Management System)** – WordPress
- **Website Builders** – Wix, Shopify
- **Coding Method** – HTML, CSS, JavaScript

Steps to create a website:

- Choose domain name
 - Buy hosting
 - Install WordPress or builder
 - Select theme/design
 - Add pages and content
 - Publish website
-

11. Website in Marketing Funnel

- Awareness → Visitors
 - Interest → Content
 - Decision → Services
 - Action → Purchase
-

12. Conclusion

A website is the foundation of digital marketing.

Proper planning + right domain + good hosting = successful website

Homework / Activity

- Choose a business idea
 - Suggest:
 - Domain name
 - Target audience
 - Website pages
-
